Nordic Green Experiences

About NGE

NGE was founded in Norway in 2017 in order to encourage the exchange of green and blue technology between the Nordics and China, supporting the UN SDG and Paris Agreement.

NGE aims to develop better communication and further partnerships between Chinese and Nordic clients, by acting as liaison and advisor in the development of pilot and larger projects targeting the use of green and blue technology in both markets. We also aim to assist our clients in finding investors and investment and funding opportunities in green and blue technology.

NGE Services

- **Consultation in preparation for entering the Chinese market**
- **Partner search between the Nordic and Chinese markets**
- **Collaboration development from conceptualization to financial support application and project execution**
- **Green and blue technology-focused site visits, seminars, and conferences**

Client Advantages

- **Communication support for swift and efficient development of partnerships**
- **Improving likelihood of commercialization success in the Chinese market**
- **Commercially successful B2B facilitation**
- **Whole-process support from pre-search consultation to post-contract follow-up**

Our Vision

Supporting the exchange of green and blue technology and expertise to the benefit of people and communities around the world.
